FOREWORD

> "Thus at the start we are compelled to recognize that crime statistics must originate with the police and that without police support there can be no crime statistics."

These words were written by the Committee on Uniform Crime Records, International Association of Chiefs of Police, in their 1929 publication entitled *Uniform Crime Reporting.* From that book came the beginning of the Uniform Crime Reporting (UCR) Program as we know it today, a Program that has endured solely through the collective efforts and diligence of our Nation's law enforcement community. Borne of law enforcement to guide everyday operations and management, the UCR Program for over 57 years has supplied the American public a reliable measure of lawlessness in our society.

The FBI was mandated by Congress in 1930 to act as an administrator of UCR. Central to the FBI's involvement has been an adherence to the spirit and intent of the original UCR Committee in both acknowledging the value of crime statistics and in applying the concept of uniformity of reporting to reconcile differences in state criminal codes. Throughout the years, the FBI has stressed that UCR is a program founded by law enforcement, voluntarily supported by law enforcement, and perhaps more importantly, to be used by law enforcement in our vital mission.

With the legacy of the Uniform Crime Records Committee, the FBI in partnership with its law enforcement colleagues is initiating a new era in crime reporting. After several years of review and study, a "Blueprint for the Future of the Uniform Crime Reporting Program" has been developed. The enhanced system as designed in the "Blueprint" provides for the reporting of all data relative to each criminal incident and arrest rather than summarizing data, as is the rule under the present Program. Key to the redesign is that the detail being sought is already in the records of law enforcement. Success depends not on an expansion of law enforcement records, but on harnessing the wealth of information already maintained.

The UCR Program in the State of South Carolina is currently at work developing a prototype for an enhanced UCR system based on the "Blueprint." As participation has been since the Program began, implementation of the redesigned Program will be voluntary. Without interruption in submissions under the present system, agencies can implement the enhanced Program at their own pace in accordance with fiscal and technical capabilities.

To ensure the best possible use of the data produced by the enhanced Program, the FBI intends an even closer working relationship with data contributors than in the past. It is anticipated that this new, incident-based system will add enormous flexibility to UCR, as well as improve statistical accuracy and usefulness. The enhanced Program should provide law enforcement administrators at all levels of government the data they require to better address the challenges produced by an ever-present crime problem.

CRIME FACTORS

The presence of crime in our Nation is a matter of serious concern not only to the law enforcement profession, but to society at large. Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Many factors affecting the volume and type of crime occurring from place to place have been delineated. Some of these are as follows:

Population density and degree of urbanization with size of locality and its surrounding area.

Variations in composition of the population, particularly youth concentration.

Stability of population with respect to residents' mobility, commuting patterns, and transient factors.

Modes of transportation and highway system.

Economic conditions, including median income, destitution, and job availability.

Cultural conditions, such as educational, recreational, and religious characteristics.

Family conditions with respect to divorce and family cohesiveness.

Climate.

Effective strength of law enforcement agencies.

Administrative and investigative emphases of law enforcement.

Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).

Attitudes of citizenry toward crime.

Crime reporting practices of citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. *The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, states, or colleges and universities solely on the basis of their population coverage or student enrollment.*

SECTION I
SUMMARY OF THE UNIFORM CRIME REPORTING PROGRAM

The Uniform Crime Reporting (UCR) Program provides a nationwide view of crime based on the cooperative efforts of over 16,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. Since 1930, the FBI has served as a national clearinghouse for the data produced by the Program, and throughout the years, has issued periodic assessments of the nature and type of crime in the Nation. The Program's primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management. Its data have over the years, however, become one of the leading social indicators in the country. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

Historical Background

Recognizing a need for national crime statistics, the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Records in the 1920s to develop a system of uniform police statistics. Since offenses known to law enforcement were the most readily available crime information, the Committee concluded that a survey of local agencies to obtain data on crimes brought to their attention was the appropriate manner by which to collect the data. Realizing that not all crimes are reported to the police, the Committee evaluated various offenses on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 completed a plan for crime reporting which became the foundation of the UCR Program.

Seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known jointly as the Crime Index, these offenses included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions by which law enforcement agencies were to submit data, without regard for local statutes, were formulated. The definitions used by the Program are set forth in Appendix II of this publication.

In January 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. Congress enacted Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information that same year. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

For over 55 years, the Program has remained virtually unchanged in terms of the data collected and disseminated. Evaluations of the Program were suggested on occasion, and one study was conducted in 1958. By the 1980s, a broad utility had evolved for UCR, and law enforcement called for a thorough evaluative study that would improve the UCR Program to meet the expanded capabilities of law enforcement to supply crime-related information. The Bureau of Justice Statistics (BJS), recognizing its role in the wide spectrum of national criminal justice statistics, agreed to underwrite a comprehensive UCR Program study and redesign effort comprised of three phases. To be conducted by an independent contractor, the first two phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first of the three phases in 1982.

During the first phase, the historical evolution of the Program was examined. All aspects of the Program, including the objectives and intended user audience, data items, reporting mechanisms, quality control, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR, held in Elkridge, Maryland, launched the second phase of the study, which would examine alternative potential futures for UCR and conclude with a set of recommended changes. Attendees at this conference reviewed work conducted

during the first phase and discussed the potential changes that should be considered during phase two. Overlapping phases one and two was a survey of law enforcement agencies.

Phase two ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." The study's Steering Committee reviewed the draft report at a March, 1985, meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April, 1985, the phase two recommendations were presented at the eighth National UCR Conference. While various considerations for the final report were set forth, the overall concept for the revised Program was unanimously approved. The joint IACP/National Sheriffs' Association (NSA) Committee on UCR also issued a resolution endorsing the Blueprint.

The final report, the "Blueprint for the Future of the Uniform Crime Reporting Program," was released in the summer of 1985. It specifically outlines recommendations for an expanded, improved UCR Program to meet informational needs into the next century. With the first two phases now complete, the third and final phase will consist of implementing the adopted improvements. As implementation progresses, the amount of information available will greatly increase, and UCR can better serve its large and varied audience.

Advisory Groups

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the IACP and the NSA. The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June, 1966, encourages sheriffs throughout the country to fully participate in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

The Association of State Uniform Crime Reporting Programs and committees on UCR within individual state law enforcement associations are also active in promoting interest in the UCR Program. These organizations foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the need arises.

Methods of Data Collection

The information compiled by UCR contributors is forwarded to the FBI either directly from the local law enforcement agency or through a state-level UCR Program. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between the FBI and its local contributors. Many of the 41 state Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index or Part I offenses brought to their attention during each month. Specifically, the crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond police control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, race, and ethnic origin of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel are reported annually, as of October 31.

Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook*, which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Since a good records system is essential for accurate crime reporting, the FBI also furnishes the *Manual of Law Enforcement Records.*

To enhance communication among Program participants, the UCR "Newsletter" and State UCR Program "Bulletin" are utilized to address Program policy, as well as to present information and instructional material. These communications are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the IACP or the Committee on Uniform Crime Reporting of the NSA.

Reporting Area

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. As discussed in Appendix III, further breakdowns rely on population figures and proximity to metropolitan areas.

A Metropolitan Statistical Area (MSA) is an integrated economic and social unit with a recognized large population nucleus. Each has a central city of at least 50,000 population or an urbanized area of at least 50,000. The county containing the central city, as well as contiguous counties which meet specified criteria of metropolitan character and

integration (designated suburban counties in UCR) is also included. Due to changes in the geographic compositions of MSAs, no year-to-year comparisons of data for those areas should be attempted.

Rural counties and "other cities," most of which are incorporated, are outside MSAs. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of the counties but outside cities, while local police report crimes committed within the city limits.

Certain tables within this publication present statistics relative to "suburban" areas. A suburban area consists of cities with fewer than 50,000 inhabitants together with counties which are within an MSA. In this context, the central city is, of course, excluded. The concept of suburban area is especially important in a study of this nature because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

During 1986, law enforcement agencies active in the UCR Program represented approximately 233 million United States inhabitants, or 96 percent of the total population as established by the Bureau of the Census. The coverage amounted to 98 percent of the United States population living in MSAs, 94 percent of the population in "other cities," and 89 percent of the rural population.

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 6, 7, 8, and 9, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated as set forth in Appendix I. Unless consisting of estimates for the total population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Population Data

Current year population figures for the Nation, states, geographic regions, and divisions are Bureau of the Census provisional estimates as of July 1, 1986. Using these figures along with the 1984 Bureau of the Census provisional estimates for all cities and counties, the populations of individual jurisdictions were extrapolated (see Appendix III). The estimated United States population increase in 1986 was approximately 1 percent over the 1985 estimate.

Offense Estimation

Tables 1 through 5 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas, "other cities," and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies.

Unique estimation procedures were used to produce estimated 1985 and 1986 forcible rape figures for the State of Illinois. In mid-1984, gender-neutral sex offense legislation was passed in that state. As a result, forcible rape figures furnished subsequently for most local law enforcement agencies by the state-level UCR Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Since the data supplied were not comparable with those provided for other agencies across the country, the 1985 and 1986 forcible rape figures for most Illinois cities and counties have been replaced with estimates using the national rates and ratios of forcible rapes versus the total crimes of violence. Forcible rape totals for affected agencies are not shown in Tables 6, 7, 8, and 9 which present individual city, county, and university/college data.

Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable time frames or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. Valid percent changes for 2, 5, and 10 years are presented in this book's tabular portions.

Recent Developments

REDESIGN OF UCR—Guidelines and procedures for the implementation of the "Blueprint for the Future of the Uniform Crime Reporting Program" are currently being tested by the state-level UCR Program operated by the South Carolina Law Enforcement Division. It is expected that testing will be completed by October of 1987. The remainder of the year will be spent refining the implementation guidelines, not only through internal study at the FBI, but in response to input from the Uniform Crime Records Committee of the International Ass ciation of Chiefs of Police (IACP), the UCR Committee of the National Sheriffs' Association (NSA), the state UCR Programs, and individual law enforcement agencies. The guidelines for the enhanced UCR Program should be ready for nationwide distribution in early 1988.

As structured at this time, the enhanced program will collect data on each single incident and arrest within approximately 25 crime categories, as opposed to the

current monthly summary reporting of eight offenses. Included in the submissions will be victim and offender characteristics, use of force, type of location, etc. A wealth of criminal justice information never before available will be produced, while the integrity of UCR's long-running statistical series will be maintained.

SPECIAL ARSON PROGRAM—In 1982, the FBI was congressionally mandated to develop, prepare, and publish, in cooperation with the National Fire Data Center, a special statistical report regarding the crime of arson. In January, 1987, in order to fulfill this mandate, a Special Arson Reporting System was initiated to augment UCR's collection on arson as a Crime Index offense. This system was designed to collect, on an incident-by-incident basis, more extensive data concerning the offense of arson, as well as valuable information on the arsonist.

The system is geared mainly toward fire fighting agencies, but in situations where those agencies lack investigative powers, the reporting responsibility is referred to the appropriate police department or sheriff's office. The collection instrument employed by this reporting system is the Arson Incident Report form. Throughout its design process, the foremost concern was to capture information consistent with data users' informational needs. Officials of the fire services and law enforcement communities, representatives of the U.S. Fire Administration, and FBI personnel familiar with precollection research and data collection concepts were involved in the design process and have expressed their approval of the end product.

Reporting supplies have been forwarded to the State Fire Marshals or directly to each individual fire fighting agency according to the wishes of the appropriate State Fire Marshal. Data submission is underway and preliminary indications of participation are favorable.

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED—In connection with its Law Enforcement Officers Killed and Assaulted Program, the national UCR staff has begun a special statistical effort to study officer homicides in much greater detail than ever before. With the assistance of the FBI's Behavioral Science Unit and an outside consultant, the staff has developed a protocol from which to interview offenders convicted of having killed law enforcement officers. The main objective of the interviews is to identify any measures the officers could have taken or avoided that would have saved their lives. An attempt is also being made to identify danger signals that may have been exhibited by the perpetrator. The protocol has been tested and interviews are being conducted. When complete, the project's data should lend new insight to officer survival training programs.

ETHNIC ORIGIN—The Office of Management and Budget (OMB) no longer authorizes the FBI to collect ethnic origin data regarding persons arrested. OMB noted that Circular A-46 previously citing the need for these data had expired. The Uniform Crime Reporting Program has discontinued its collection of ethnic origin data for persons arrested beginning with the 1987 reporting year and is presenting its final national figures in this edition of "Crime in the United States."

The crime clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II
CRIME INDEX OFFENSES REPORTED

MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

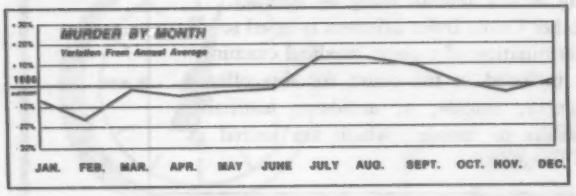
The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1985	*18,976*	*7.9*
1986	*20,613*	*8.6*
Percent change	*+8.6*	*+8.9*

Volume

There were an estimated 20,613 murders in the United States during 1986, representing 1 percent of the violent crimes committed. More of these offenses occurred during July and August, while the lowest number of incidents was recorded in February.



Murder by Month, 1982-1986

[Percent of annual total]

Months	1982	1983	1984	1985	1986
January	8.3	8.4	8.3	8.1	7.7
February	7.5	7.6	7.5	7.9	7.0
March	8.1	8.4	8.1	8.1	8.3
April	7.9	8.0	7.9	7.6	8.0
May	8.8	8.3	8.0	7.6	8.2
June	8.4	7.6	7.8	8.2	8.3

November	7.5	7.8	8.6	8.2	8.0
December	9.0	9.0	9.0	9.4	8.4

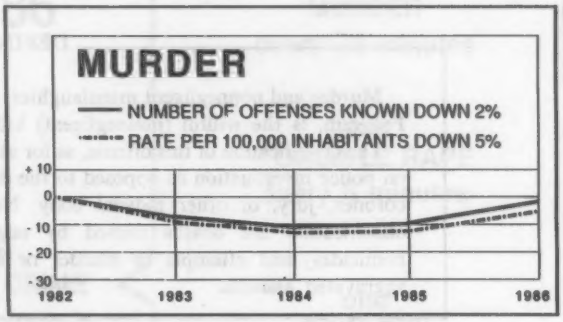
When viewing the four regions of the Nation, the Southern States, the most populous, accounted for 42 percent of the murders. The Western States reported 22 percent; the Midwestern States, 19 percent; and the Northeastern States, 17 percent.

Trend

The number of murders in the United States increased by 9 percent in 1986 as compared to the 1985 total. The Nation's cities overall experienced an increase of 12 percent, with upward trends recorded in all city groups. The increases ranged from 19 percent in cities with populations from 250,000 to 499,999 to 5 percent in those under 10,000 inhabitants. Suburban counties recorded a 2-percent rise, while the rural counties (the only area to show a decrease) registered a 4-percent decline.

Geographically, all regions recorded increases in the number of murder incidents for the 2-year period. The Northeast and West each showed upswings of 11 percent, and the South and Midwest both registered rises of 7 percent.

The accompanying chart reveals a 2-percent decrease nationally in the murder counts from 1982 to 1986. The 10-year trend, however, showed the 1986 total 8 percent above the 1977 level.



Rate

An average of 9 of every 100,000 United States inhabitants were murder victims during 1986. On a regional basis, the Southern States averaged 11 murders per 100,000 people; the Western States, 9 per 100,000; and both the Northeastern and Midwestern States, 7 per 100,000. Rate increases were seen in all regions, 1985 versus 1986. The murder rate in the Northeast was up 11 percent and in the West, 8 percent. The Midwest and the South each recorded increases of 6 percent.

The Nation's metropolitan areas reported a murder rate of 10 victims per 100,000 inhabitants. The rural counties, as well as cities outside suburban areas, registered a lower rate of 5 per 100,000. Compared to the previous year's rate, the 1986 National Murder rate increased 9 percent.

Nature

Supplemental data provided by contributing agencies recorded information for 19,257 of the estimated 20,613 murders in 1986. Submitted monthly, the data consist of the age, sex, race, and ethnic origin of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Based on this information, 75 percent of the murder victims in 1986 were males; and 91 percent were persons 18 years of age or older. Forty-nine percent were aged 20 through 34 years. Considering victims for whom race was known, an average of 53 of every 100 were white, 44 were black, and the remainder were persons of other races. Eighteen percent of the victims for whom ethnicity was reported were Hispanic.

[1]Does not include unknown ages.

Data based on incidents involving one victim and one offender showed that in 1986, 95 percent of the black murder victims were slain by black offenders, and 88 percent of the white murder victims were killed by white offenders.

Likewise, males were most often slain by males (83 percent in single victim/single offender situations). These same data showed, however, that 9 of every 10 female victims were murdered by males.

As in previous years firearms were the weapons used in 3 of every 5 murders committed in the United States. Of all murders, 44 percent were by handguns; 7 percent by shotguns; and 4 percent by rifles. Other or unknown types of firearms accounted for another 4 percent of the total murders.

Among the remaining weapons, cutting or stabbing instruments were employed in 21 percent of the murders; blunt objects (clubs, hammers, etc.) in 6 percent; and other dangerous weapons, such as poison, explosives, etc., in 8 percent. Personal weapons (hands, fists, feet, etc.) were employed in 7 percent.

[1]Does not include unknown ages.

Supporting the philosophy that murder is primarily a societal problem over which law enforcement has little or no control is the fact that nearly 3 of every 5 murder victims in 1986 were related to (16 percent) or acquainted with (42 percent) their assailants. Among all female murder victims in 1986, 30 percent were slain by husbands or boyfriends. Six percent of the male victims were killed by wives or girlfriends.

Arguments resulted in 38 percent of the murders during the year. Nineteen percent occurred as a result of felonious activities such as robbery, arson, etc., while another 2 percent were suspected to have been the result of some felonious activity. Four percent of the murders were committed during brawls while offenders were under the influence of alcohol or narcotics. The table on the following page shows murder circumstances for the past 5 years.

[1]Because of rounding, percentages may not add to totals.
[2]Includes murders committed while offender was under the influence of alcohol and/or narcotics.

Clearances

The clearance rate for murder continued to be higher than for any other Crime Index offense. Law enforcement agencies nationwide, as well as in the cities, were successful in clearing 70 percent of the murders occurring in their jurisdictions during 1986. Cities 10,000 to 24,999 in population reported the most successful clearance rate, 81 percent. Seventy-eight percent of murders in rural counties and 67 percent of those in suburban counties were cleared.

Regionally, the murder clearance rate was highest in the Southern States, 76 percent. Following were the Northeastern States with 69 percent and the Midwestern and Western States with 65 percent each.

Persons under 18 years of age were involved in murder less often than in any other offense in 1986. They accounted for 5 percent of the willful killings cleared by law enforcement nationally, as well as in cities and in rural counties. Four percent of the suburban county clearances involved only persons in this young-age group.

Persons Arrested

Murder arrests overall increased 4 percent in 1986 from the 1985 volume. Arrests of persons under age 18 increased 9 percent, while those of persons aged 18 and over rose 4 percent. During the same 2-year period, male and female arrests were up, 4 and 5 percent, respectively.

Forty-one percent of all murder arrestees in 1986 were under 25 years of age, with 9 percent of the total being 17 or younger. The 18- to 24-year age group showed the greatest involvement in this offense, accounting for 33 percent of the total 1986 murder arrests.

Whites comprised 50 percent of the total arrestees for murder in 1986. Blacks made up 48 percent, and the remainder were of other races. Sixteen percent of the arrestees were of Hispanic ethnicity.

Long-term trends indicate the 1986 murder arrest total was 7 percent below the 1982 level but 9 percent above the 1977 figure.

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

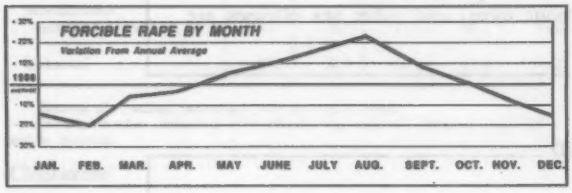
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1985	*87,671*	*36.7*
1986	*90,434*	*37.5*
Percent change	*+ 3.2*	*+ 2.2*

Volume

During 1986, there were an estimated 90,434 forcible rapes in the Nation, comprising 1 percent of the Crime Index total and 6 percent of the violent crime volume. Geographically, the Southern States, the region with the largest population, accounted for 37 percent of the offenses. Following were the West with 24 percent, the Midwest with 23 percent, and the Northeast with 16 percent.

Monthly totals showed the greatest number of forcible rapes were reported during the summer, with August recording the highest frequency. The lowest total was registered in February.



Forcible Rape by Month, 1982-1986

[Percent of annual total]

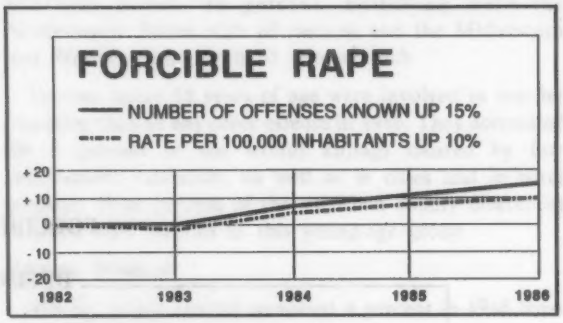
Months	1982	1983	1984	1985	1986
January	7.1	7.3	7.1	7.2	7.1
February	7.2	6.9	7.1	6.6	6.7
March	8.0	7.6	7.6	8.2	7.9
April	8.0	7.9	7.7	8.3	8.1
May	9.0	8.5	8.6	8.9	8.8
June	9.3	8.8	8.9	9.0	9.2
July	10.2	9.9	9.9	10.1	9.8
August	10.0	10.4	10.2	9.9	10.2
September	8.6	9.1	9.1	8.8	9.1
October	8.3	8.7	9.0	8.5	8.4
November	7.2	7.7	7.2	7.7	7.8
December	7.2	7.1	7.5	6.9	7.0

Trend

Compared to the previous year, the 1986 forcible rape volume was 3 percent higher nationwide, in cities, and in rural counties. The increase in the suburban counties was 6 percent. Among all population groupings, only cities with 1 million or more inhabitants showed a decline; locales of that size collectively recorded a 4-percent decrease.

Geographically, three of the four regions in the country—the Midwestern, Southern, and Western States—registered 4-percent increases. The Northeastern States experienced the only decline, 1 percent.

National trends for 5 and 10 years show that the forcible rape total rose 15 percent from 1982 and 42 percent from 1977.



Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female. In 1986, an estimated 73 of every 100,000 females in the country were reported rape victims, a rate increase of 2 percent from 1985. Since 1982, the female forcible rape rate has risen 10 percent.

Female forcible rape rates for 1986 showed there were 84 victims per 100,000 females in MSAs, 43 per 100,000 females in cities outside metropolitan areas, and 35 per 100,000 females in rural counties.

Regionally, the highest female rape rate was in the Western States, which recorded 86 victims per 100,000 females. Following were the Southern States with a rate of 79, the Midwestern States with 69, and the Northeastern States with 55.

Nature

Of all reported forcible rapes during 1986, 80 percent were rapes by force. The remainder were attempts or assaults to commit forcible rape. A 4-percent increase was registered in the number of rapes by force, and attempts to commit rape increased 2 percent from the 1985 figure.

Clearances

Nationwide in 1986, 52 percent of the forcible rapes reported to law enforcement were cleared by arrest or exceptional means. Rural county law enforcement agencies cleared 58 percent of the offenses brought to their attention, while suburban county agencies cleared 54 percent and those in cities, 51 percent.

Clearance rates for the regions ranged from 45 percent in the Midwestern States to 57 percent in the Southern States. In the Northeastern States, the clearance rate for forcible rape was 56 percent, and in the Western States, it was 49 percent.

Of the total clearances for forcible rape in the country as a whole, 10 percent involved only persons under 18 years of age. The Nation's cities and rural counties also recorded 10

percent involvement of this age group, whereas the suburban counties reported 9 percent.

Persons Arrested

The number of arrests for forcible rape rose nearly 1 percent nationwide, as well as in the cities, from 1985 to 1986. These arrests were up 2 percent in the suburban counties but remained virtually the same in the rural counties. For the 5-year period, 1982 to 1986, total forcible rape arrests and those of adults rose 12 percent. Arrests of persons under 18 years of age for this offense increased 14 percent during the same timespan.

Of the forcible rape arrestees in 1986, 45 percent were persons under the age of 25, with 30 percent of the total being in the 18- to 24-year age group. Fifty-two percent of those arrested were white, 47 percent were black, and all other races comprised the remainder. Hispanics comprised 12 percent of the total arrestees.

ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

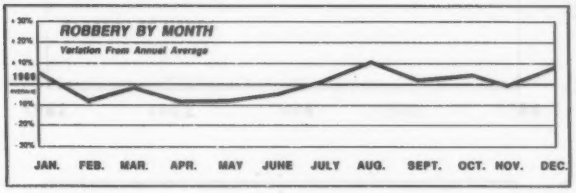
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1985	*497,874*	*208.5*
1986	*542,775*	*225.1*
Percent change	*+ 9.0*	*+ 8.0*

Volume

Accounting for 4 percent of all Index crimes and 36 percent of violent crimes, the estimated robbery total in 1986 was 542,775. During the year, robberies occurred most frequently in August and least often in April.

Regionally, the most populous Southern States registered 31 percent of all reported robberies. Following were the Northeastern States with 27 percent, the Western States with 23 percent, and the Midwestern States with the remainder.



Robbery by Month, 1982-1986

[Percent of annual total]

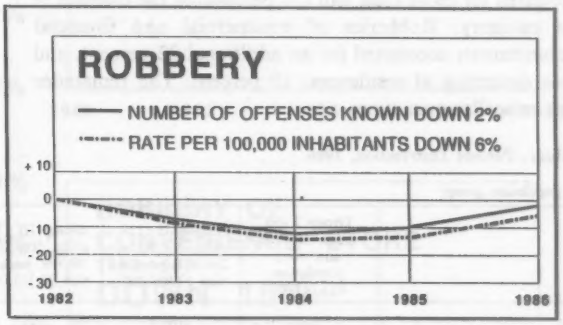
Months	1982	1983	1984	1985	1986
January	9.1	9.5	8.9	8.6	8.7
February	8.2	8.1	8.2	7.4	7.7
March	8.0	8.3	8.1	7.9	8.2
April	7.5	7.6	7.6	7.3	7.6
May	7.5	7.4	7.6	7.5	7.7
June	7.7	7.4	7.5	7.7	8.0
July	8.4	7.9	7.9	8.6	8.4
August	8.5	8.6	8.5	8.9	9.3
September	8.3	8.4	8.2	8.4	8.6
October	8.5	8.8	9.0	9.1	8.7
November	8.4	8.8	8.6	8.8	8.3
December	9.8	9.2	9.9	9.7	9.0

Trend

Nationwide and in the cities, 1986 robbery volumes were 9 percent higher than 1985 levels. The suburban counties experienced a 13-percent jump in robberies and the rural counties, a 5-percent rise. Of the cities, those with populations under 10,000 registered the greatest increase, 12 percent.

Two-year regional trends show the number of robberies was up in all regions. The increases were 17 percent in the South; 9 percent in the Midwest; 8 percent in the West; and 3 percent in the Northeast.

The accompanying chart depicts the trend in the robbery volume, as well as the robbery rate, for the years 1982-1986. In 1986, the number of robbery offenses was 2 percent lower than in 1982 but 32 percent above the 1977 total.



Rate

The national robbery rate in 1986 was 225 per 100,000 people, an increase of 8 percent over the 1985 rate. With 960 robberies per 100,000 inhabitants, the highest rate was recorded in cities with populations over 1 million, while the rural counties' rate of 15 was the lowest. In metropolitan areas, the robbery rate was 286, and in cities outside metropolitan areas, it was 49.

Higher robbery rates were evident in all regions during 1986. The Northeast's rate of 298 per 100,000 population was up 2 percent; the West's rate of 251 was 6 percent higher; the South's rate of 199 was a jump of 15 percent; and the Midwest's rate of 179 represented an 8-percent increase.

Nature

In 1986, a total estimated national loss of $323 million was due to robberies. The value of property stolen during robberies averaged $596 per incident. Average dollar losses ranged from $303 taken during robberies of gas or service stations to $2,664 per bank robbery. The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

As in previous years, robberies on streets or highways accounted for more than half (56 percent) of the offenses in this category. Robberies of commercial and financial establishments accounted for an additional 22 percent, and those occurring at residences, 10 percent. The remainder were miscellaneous types.

[1]Because of rounding, percentages may not add to totals.

All types of robbery increased from 1985 to 1986. The increases ranged from 15 percent for commercial house robberies to 3 percent for those of gas or service stations.

Forty-three percent of all robberies in 1986 were committed through the use of strong-arm tactics. Firearms were used in 34 percent, knives or cutting instruments in 13 percent, and other weapons in the remaining 10 percent. A comparison of 1985 and 1986 robbery totals by weapon showed those by knives or cutting instruments up 12 percent. Robberies by firearms were up 6 percent, and those by other dangerous weapons rose 16 percent. Strong-armed robberies increased 8 percent in volume during the 2-year period.

Clearances

For every 4 robberies reported in 1986, one was cleared by law enforcement. The highest robbery clearance rate—38 percent—was registered by rural law enforcement agencies. Suburban county agencies cleared 28 percent and those in cities, 24 percent. Regional robbery clearance percentages were 27 percent in the South, 25 percent in both the West and Northeast, and 20 percent in the Midwest.

Nationally, as well as for city and suburban county law enforcement agencies, persons under the age of 18 were the offenders in 11 percent of all 1986 robbery clearances. This age group accounted for 7 percent of the rural county clearances.

Persons Arrested

Nationally, arrests for robbery rose 7 percent in 1986 when compared to 1985. This same increase was experienced in both the cities and the suburban counties; the rural counties, however, showed a decrease of 6 percent.

Sixty-two percent of all robbery arrestees in 1986 were under 25 years of age, and 92 percent were males. Sixty-two percent of those arrested were black, 37 percent were white, and the remainder were of other races. Fourteen percent of the robbery arrestees were Hispanic.

The total number of robbery arrests, as well as those of males arrested for this offense, decreased 4 percent during the 5-year period, 1982-1986. Female arrests were up 2 percent for this same timespan. Juvenile arrests were down 16 percent, while those of adults showed little change.

AGGRAVATED ASSAULT

DEFINITION

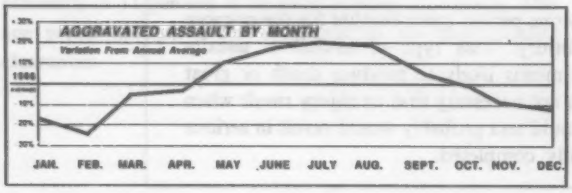
Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1985	*723,246*	*302.9*
1986	*834,322*	*346.1*
Percent change	*+ 15.4*	*+ 14.3*

Volume

Totaling an estimated 834,322 offenses nationally, aggravated assaults in 1986 occurred most frequently in the summer months. Geographic distribution figures show that 37 percent of the aggravated assault volume was accounted for by the Southern States, 25 percent by the Western States, 21 percent by the Midwestern States, and the remainder by the Northeastern States.



Aggravated Assault by Month, 1982-1986

[Percent of annual total]

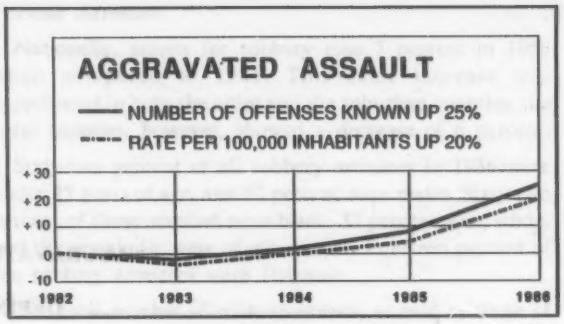
Months	1982	1983	1984	1985	1986
January	7.3	7.7	7.0	7.0	6.8
February	7.1	7.1	7.0	6.8	6.3
March	8.1	7.9	7.8	8.2	8.0
April	8.3	8.1	7.9	8.2	8.1
May	9.0	8.9	8.7	8.8	9.1
June	9.2	8.9	9.1	9.0	9.7
July	9.7	9.8	9.6	9.5	10.0
August	9.0	9.7	9.5	9.5	10.0
September	8.7	8.9	8.8	8.9	8.8
October	8.5	8.5	8.9	8.8	8.3
November	7.4	7.4	7.6	7.9	7.6
December	7.7	7.3	8.1	7.4	7.4

Trend

Upward trends in aggravated assault were evident nationwide and throughout all regions and population groups in 1986. The increases over 1985 were 10 percent in the Northeast, 12 percent in the South, 14 percent in the Midwest, and 26 percent in the West. Nationally, the aggravated assault total rose 15 percent for the 2-year period.

By population group, cities with 1 million or more inhabitants recorded the greatest rise in aggravated assaults from 1985, 24 percent. Upswings of 17 percent in the cities collectively, 12 percent in the suburban counties, and 7 percent in the rural counties were registered for this offense during the same time period.

Five- and 10-year trends show aggravated assaults up 25 percent from 1982 and 56 percent from 1977.



Rate

There were 346 reported victims of aggravated assault for every 100,000 people nationwide in 1986. Higher than the national average, the rate in metropolitan areas was 394 per 100,000. Cities outside metropolitan areas experienced a rate of 274 and rural counties, a rate of 137.

The 1986 aggravated assault rate increased 14 percent over 1985 and 20 percent above the 1982 level.

Nature

Weapon distribution data for 1986 showed 32 percent of the aggravated assaults reported were committed with blunt objects or other dangerous weapons. Of the remaining categories, personal weapons such as hands, fists, and feet were used in 25 percent of the offenses; knives or cutting instruments in 22 percent; and firearms in 21 percent.

From 1985 to 1986, aggravated assaults committed with cutting instruments increased 10 percent; those with firearms, 13 percent; and those with blunt objects or other dangerous weapons, 16 percent. Assaults where personal weapons were used showed the greatest increase, 21 percent.

The following table shows the 1986 regional experience of aggravated assault by type of weapon used.

Aggravated Assault, Type of Weapons Used, 1986

[Percent distribution by region]

Region	Total all weapons[1]	Fire-arms	Knife or cutting instru-ments	Other weapons (clubs, blunt objects, etc.)	Personal weapons
Total	100.0	21.1	22.0	31.9	24.8
Northeastern States	100.0	13.3	24.8	34.7	27.1
Midwestern States	100.0	24.4	23.1	34.4	18.1
Southern States	100.0	25.5	23.6	30.5	20.4
Western States	100.0	18.1	17.0	30.0	35.0

[1]Because of rounding, percentages may not add to totals.

Clearances

During 1986, law enforcement agencies nationwide and in the cities cleared 59 percent of the aggravated assaults reported. The highest clearance rate, 67 percent, was recorded by the rural counties and cities with populations less than 10,000.

Geographically, clearance percentages for aggravated assault were 62 percent in the South, 59 percent in both the West and Northeast, and 55 percent in the Midwest.

Nine percent of the clearances reported by city and suburban county agencies involved only persons under age 18. Persons in this age group were identified as the assailants in 8 percent of the national and 6 percent of the rural county aggravated assault clearances.

Persons Arrested

The estimated 351,770 persons arrested for aggravated assault in 1986 represented 71 percent of all arrestees for violent crimes. Whites comprised 59 percent of the arrestees; blacks, 40 percent; and all other races, the remainder. Eighty-seven percent of the arrestees were males and 13 percent, females. Eighty-five percent were non-Hispanic.

Total arrests for aggravated assault were up 16 percent in 1986 from the 1985 total. During this 2-year period, adult arrests rose 17 percent and those of juveniles increased 7 percent. A comparison of 1982 and 1986 figures showed total arrests for this offense up 15 percent; those of persons under age 18, up 9 percent; and those of adults, up 16 percent.

BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

TREND

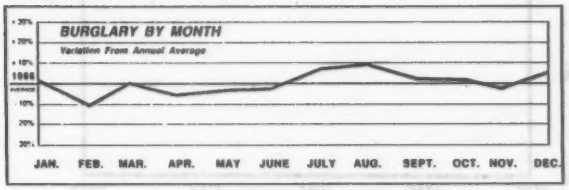
Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1985	*3,073,348*	*1,287.3*
1986	*3,241,410*	*1,344.6*
Percent change	*+ 5.5*	*+ 4.5*

Volume

The estimated national burglary total in 1986 was over 3.2 million. Burglaries accounted for 25 percent of all Crime Index offenses and 28 percent of property crimes.

Distribution figures for the regions showed that the highest burglary volume occurred in the Southern States, 39 percent. The Western States followed with 25 percent, the Midwestern States with 20 percent, and the Northeastern States with 16 percent.

Like the previous year, more burglaries occurred more frequently in August than any other month and least often in February.



Burglary by Month, 1982-1986

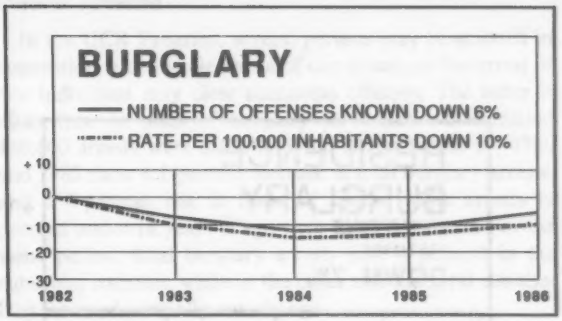
[Percent of annual total]

Months	1982	1983	1984	1985	1986
January	8.4	9.1	8.3	8.2	8.4
February	7.7	7.8	7.9	7.2	7.5
March	8.4	8.5	8.0	8.2	8.3
April	7.9	7.9	7.8	7.8	7.9
May	7.9	8.1	8.0	8.0	8.1
June	8.3	7.8	7.8	7.9	8.1
July	8.8	8.5	8.7	9.0	8.9
August	8.8	9.0	8.9	9.1	9.0
September	8.3	8.4	8.3	8.5	8.5
October	8.3	8.5	8.8	9.0	8.4
November	8.3	8.3	8.4	8.5	8.1
December	8.9	8.1	9.0	8.8	8.8

Trend

The 1986 burglary volume was 5 percent higher than in 1985 nationwide, as well as in the cities and rural counties. In the suburban counties, a 6-percent increase was registered.

Geographically, the Northeastern States showed virtually no change in the burglary count, while the three remaining regions experienced upswings. Burglary rose 12 percent in the Southern States, 3 percent in the Western States, and 2 percent in the Midwestern States.



Rate

A burglary rate of 1,345 per 100,000 inhabitants was registered nationwide in 1986. The rate increased 4 percent over 1985 but was 10 percent below the 1982 rate. For every 100,000 in population, the rate was 1,510 in the metropolitan areas, 1,046 in the cities outside metropolitan areas, and 649 in the rural counties.

Regionally, the burglary rate in the South was 1,523, an increase of 11 percent from the previous year. The rate was up 1 percent from 1985 in both the West and Midwest where the 1986 rates were 1,671 and 1,082, respectively. The Northeast, with a rate of 1,043, was the only region to show a decline, 1 percent.

Nature

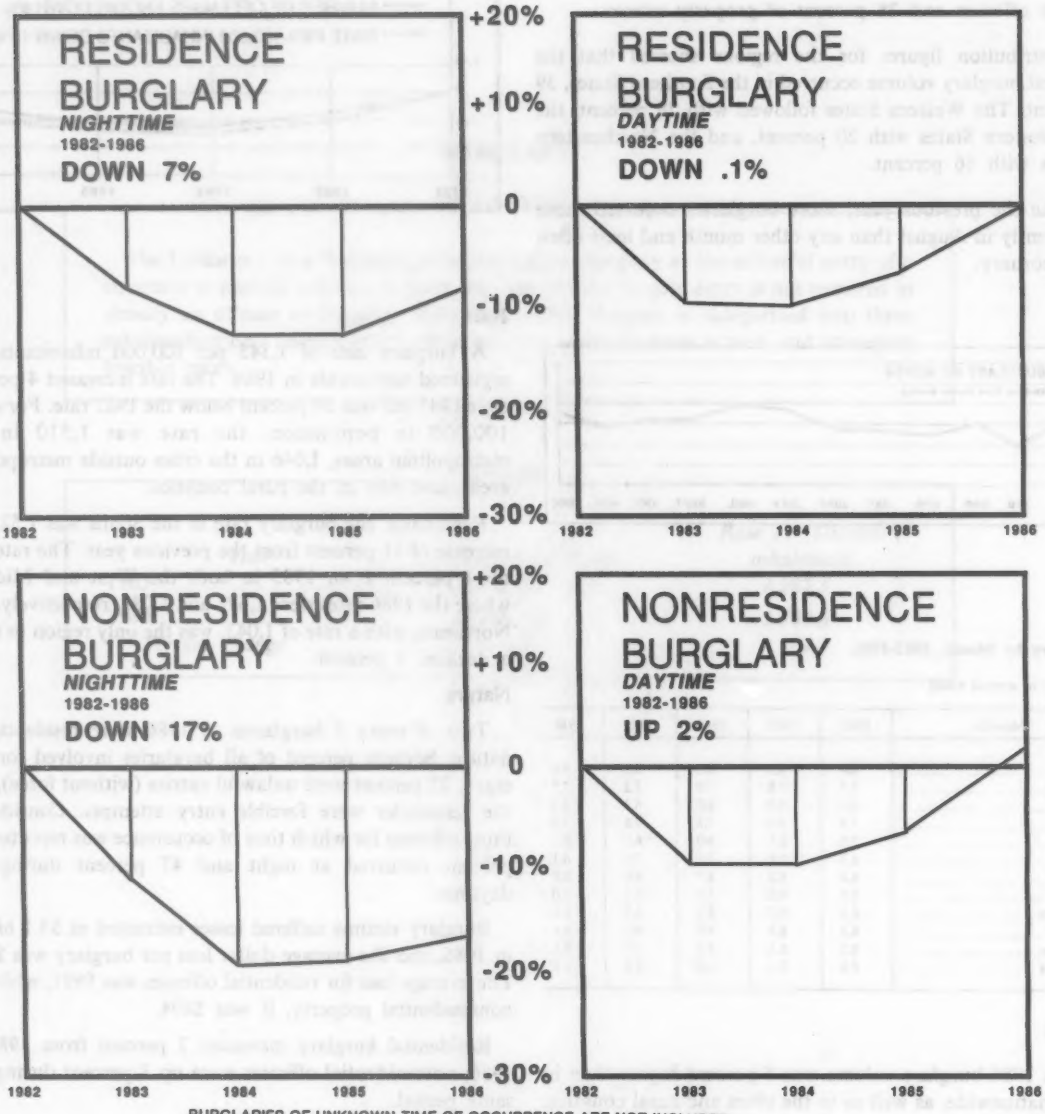
Two of every 3 burglaries in 1986 were residential in nature. Seventy percent of all burglaries involved forcible entry, 22 percent were unlawful entries (without force), and the remainder were forcible entry attempts. Considering those offenses for which time of occurrence was reported, 53 percent occurred at night and 47 percent during the daytime.

Burglary victims suffered losses estimated at $3.1 billion in 1986, and the average dollar loss per burglary was $960. The average loss for residential offenses was $991, while for nonresidential property, it was $894.

Residential burglary increased 7 percent from 1985 to 1986; nonresidential offenses were up 3 percent during the same period.

Clearances

In 1986, 14 percent of the burglaries brought to the attention of law enforcement agencies across the country were cleared. Geographically, a 16-percent clearance rate was registered in the South. In both the Northeast and West, the rate was 13 percent, while in the Midwest, it was 11 percent.



BURGLARIES OF UNKNOWN TIME OF OCCURRENCE ARE NOT INCLUDED.

Rural county law enforcement cleared 16 percent of the burglaries in their jurisdictions. Those in the suburban counties recorded a clearance rate of 15 percent, and agencies in cities obtained clearances in 13 percent of these crimes.

Adults were involved in 79 percent of all burglary offenses cleared, and only young people under 18 years of age were offenders in the remaining 21 percent. Similar to the national experience, persons under age 18 accounted for 21 percent of the burglary clearances in both cities and suburban counties and 22 percent of those in rural counties. The highest degree of juvenile involvement in burglary was recorded in the Nation's smallest cities (under 10,000 population) where young persons under 18 years of age comprised 28 percent of the clearances.

Persons Arrested

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary for which an estimated 450,600 arrests were made in 1986. Arrest trends for 1986 and 1985 show a 1-percent increase in total burglary arrests, and a 4-percent rise in those of adults, while arrests of persons under 18 years of age were down 5 percent. For the same period, total burglary arrests rose 4 percent in the suburban counties, while in the cities and the rural counties they showed virtually no change.

Ninety-two percent of the burglary arrestees during 1986 were males and 71 percent were under 25 years of age. Of the total burglary arrestees, whites accounted for 69 percent, blacks for 30 percent, and other races for the remainder. Eighty-five percent of the persons arrested for burglary were non-Hispanic.

LARCENY-THEFT

DEFINITION

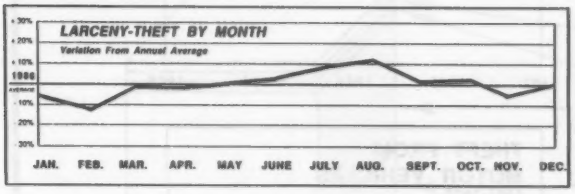
Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1985	*6,926,380*	*2,901.2*
1986	*7,257,153*	*3,010.3*
Percent change	*+ 4.8*	*+ 3.8*

Volume

Estimated at 7,257,153 offenses in 1986, larceny-thefts comprised 55 percent of the Crime Index total and 62 percent of the property crimes. When viewed monthly, larceny-thefts were recorded most often during August and least frequently in February.



Regionally, the most populous Southern States recorded 36 percent of the total. The Western States registered 25 percent; the Midwestern States, 23 percent; and the Northeastern States, 17 percent.

Larceny-Theft by Month, 1982-1986

[Percent of annual total]

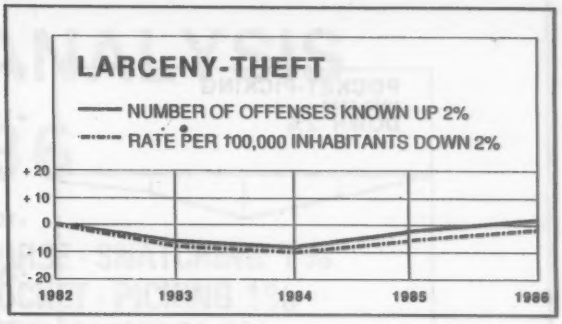
Months	1982	1983	1984	1985	1986
January	7.1	8.1	7.5	7.4	7.8
February	7.1	7.4	7.6	7.0	7.2
March	8.0	8.4	8.0	8.2	8.3
April	7.9	8.1	8.0	8.1	8.2
May	8.3	8.4	8.2	8.4	8.4
June	8.9	8.5	8.4	8.5	8.6
July	9.2	8.9	9.0	9.3	9.1
August	9.4	9.4	9.4	9.5	9.3
September	8.6	8.4	8.3	8.4	8.4
October	8.7	8.6	8.9	8.9	8.5
November	8.2	8.0	8.2	8.2	7.9
December	8.5	7.7	8.5	8.1	8.3

Trend

A comparison of 1985 and 1986 figures showed that larceny-theft increased 5 percent nationally, in cities collectively, and in the suburban counties. Rural counties showed a rise of 3 percent.

Volume increases among the regions ranged from 8 percent in the Southern States to 2 percent in the Northeastern States. The Western States showed a 4-percent upswing in larceny-thefts and the Midwestern States, a 3-percent rise.

The 5- and 10-year volume trends showed a 2-percent increase over 1982 and a 23-percent rise over 1977 figures.



Rate

Four percent higher than in 1985, the 1986 larceny-theft rate was 3,010 per 100,000 United States inhabitants. The larceny-theft rate was 3,374 per 100,000 inhabitants of metropolitan areas; 3,191 per 100,000 population in cities outside metropolitan areas; and 921 per 100,000 people in the rural counties.

Regionally, all larceny-theft rates increased over 1985 levels. The 1986 rates per 100,000 inhabitants were 3,662 in the Western States, 3,107 in the Southern States, 2,792 in the Midwestern States and 2,473 in the Northeastern States.

Nature

The average value of property stolen due to larceny-theft during 1986 was $400, up from $393 in 1985. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was $2.9 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 27 percent of the thefts reported to law enforcement in 1986 ranged from $50 to $200, while in 34 percent, they were over $200.

Losses of goods and property reported stolen as a result of pocket-picking was $248; purse-snatching, $208; and shoplifting, $86. Thefts from buildings resulted in an average loss of $646; from motor vehicles, $428; and from coin-operated machines, $129. The average value loss due to thefts of motor vehicle accessories was $282 and for thefts of bicycles, $167.

Thefts of motor vehicle parts, accessories, and contents made up the largest portion of reported larcenies—37 percent. Also contributing to the high volume of thefts were those from buildings and shoplifting, each accounting for 15 percent; and bicycle thefts, accounting for 7 percent. The remainder were distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and all other

From coin-operated machines	.9	.8	.7	1.2	.8
All others	22.2	16.9	23.7	25.9	19.1

[1]Because of rounding, percentages may not add to totals.

Clearances

Nationwide and in cities during 1986, 20 percent of the reported larceny-thefts were cleared. The highest clearance rate, 24 percent, was reported by law enforcement agencies in cities from 10,000 to 24,999 in population. Those in suburban counties recorded an 18-percent rate, and in rural counties, 17 percent.

Regionally, law enforcement agencies in the West cleared 21 percent of the larceny offenses brought to their attention. The clearance rate in the South and Midwest was 20 percent; and in the Northeast, 18 percent.

Persons under 18 years of age were involved in 23 percent of the national clearances for larceny-theft. Twenty-four percent of the clearances in cities, 21 percent of those in suburban counties, and 17 percent of those in rural counties were accounted for by persons in this age group.

Persons Arrested

The number of persons arrested for larceny-theft was 4 percent higher in 1986 than in 1985. Like the overall increase, female arrests for this offense were up 4 percent, and those of males increased 5 percent. During this same period, adult arrests rose 6 percent while those of persons under 18 years of age were up 2 percent.

Considering a longer timeframe, larceny-theft arrests showed a 5-percent increase for the 5-year period, 1982-1986. Juvenile arrests were up 1 percent, and those of adults rose 6 percent during this timespan.

Larceny-thefts not only comprised the largest portion of Crime Index offenses reported to law enforcement, they also accounted for 55 percent of the arrests for Index crimes in 1986. Forty-six percent of the larceny arrests were of persons under 21 years of age, and 32 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1986, comprised 31 percent of all larceny-theft arrestees.

Whites accounted for 68 percent of the total larceny-theft arrests, blacks for 30 percent, and all other races made up the remainder. Eighty-eight percent of the arrestees were persons of non-Hispanic ethnicity.

MOTOR VEHICLE THEFT

DEFINITION

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

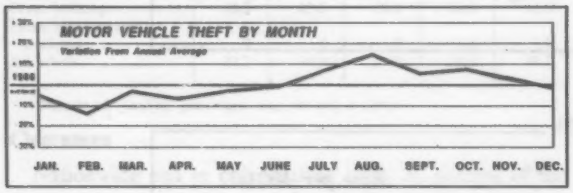
TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1985	*1,102,862*	*462.0*
1986	*1,224,137*	*507.8*
Percent change	*+ 11.0*	*+ 9.9*

Volume

Accounting for 9 percent of all Index crimes and 10 percent of all property crimes, motor vehicle thefts totaled an estimated 1,224,137 offenses in 1986. The regional distribution of motor vehicle theft showed 31 percent of the volume was in the Southern States, 24 percent in the Northeastern States, 23 percent in the Western States, and 22 percent in the Midwestern States.

Motor vehicle theft figures by month showed that the greatest number occurred in August, while the lowest was in February.



Motor Vehicle Theft by Month, 1982-1986

[Percent of annual total]

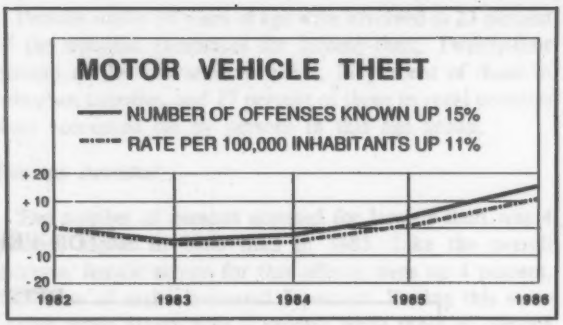
Months	1982	1983	1984	1985	1986
January	7.9	8.3	8.0	7.8	7.9
February	7.5	7.5	7.7	7.1	7.1
March	8.2	8.4	8.0	8.1	8.1
April	8.0	8.0	7.8	7.8	7.8
May	8.2	8.1	8.0	8.0	8.0
June	8.6	8.0	8.0	8.2	8.2
July	8.9	8.5	8.8	8.9	8.9
August	9.1	9.1	9.1	9.1	9.5
September	8.5	8.5	8.7	8.7	8.7
October	8.6	8.7	8.9	9.1	9.0
November	8.1	8.4	8.5	8.6	8.5
December	8.3	8.5	8.6	8.7	8.3

Trend

When viewing 1985 to 1986 figures, the number of motor vehicle thefts rose 11 percent nationally, with the increase extending into all regions, areas, and population groups. The Nation's cities recorded a 12-percent rise; suburban counties, a 10-percent increase; and rural counties, a 6-percent rise.

Geographically, the increases were 16 percent in the Southern States, 14 percent in the Western States, 8 percent in the Northeastern States, and 5 percent in the Midwestern States.

The accompanying chart shows that the volume of motor vehicle thefts in 1986 increased 15 percent over the 1982 volume. It was 25 percent above the 1977 level.



Rate

The 1986 national motor vehicle theft rate—508 per 100,000 people—was 10 percent higher than the rate in 1985. The rate was 11 percent higher than in 1982 and 12 percent above the 1977 experience.

For every 100,000 inhabitants living in MSAs, there were 619 motor vehicle thefts reported in 1986. The rate in cities outside metropolitan areas (other cities) was 206 and in rural counties, 108. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem.

Among the regions, the motor vehicle theft rates ranged from 587 per 100,000 people in the Northeastern States to 448 in the Midwestern States. The Western States' rate was 584 and the Southern States' rate, 458. From 1985 to 1986, rate increases were registered in the Southern States, 14 percent; the Western States, 11 percent; the Northeastern States, 8 percent; and the Midwestern States, 5 percent.

In 1986, an estimated average of 1 of every 149 registered motor vehicles was stolen nationwide. Regionally, this rate was greatest in the Northeast where 1 of every 108 motor vehicles registered was stolen. The other three regions reported lesser rates—1 per 134 in the West, 1 per 171 in the South, and 1 per 177 in the Midwest.

Nature

An estimated national loss of $6 billion in 1986 was due to motor vehicle theft. At the time of theft, the average value per vehicle stolen was $4,888.

Of all motor vehicles reported stolen during the year, 77 percent were automobiles, 14 percent were trucks or buses, and the remainder were other types.

Motor Vehicle Theft, 1986

[Percent distribution by region]

Region	Total[1]	Autos	Trucks and buses	Other vehicles
Total	100.0	77.3	13.6	9.1
Northeastern States	100.0	90.7	5.0	4.3
Midwestern States	100.0	83.5	8.2	8.4
Southern States	100.0	71.7	17.7	10.6
Western States	100.0	66.1	21.5	12.5

[1]Because of rounding, percentages may not add to totals.

Clearances

The national clearance rate for motor vehicle theft in 1986 was 15 percent. City law enforcement agencies cleared 14 percent of the motor vehicle thefts reported in their locales; those in the suburban counties cleared 19 percent; and in rural counties, 32 percent.

Regional clearance percentages for motor vehicle theft were 9 percent in the Northeastern States, 14 percent in the Midwestern States, 16 percent in the Western States, and 19 percent in the Southern States.

Persons in the under 18 age group accounted for 20 percent of the motor vehicle thefts cleared nationwide, in cities and in suburban counties. They comprised 19 percent of the clearances in the rural counties.

Persons Arrested

Of persons arrested for motor vehicle theft in 1986, 91 percent were males. Sixty-four percent of the arrestees were white, 35 percent were black, and the remainder were of other races. Sixteen percent of the arrestees were Hispanic.

A large proportion of arrestees was accounted for by the younger segment of the population. In 1986, 58 percent of all persons arrested for this offense were under 21 years of age, and those under age 18 comprised 39 percent of the total. From 1985, arrests of persons under age 18 were up 19 percent, with arrests of males in this age group up 20 percent and those of females up 14 percent.

Total motor vehicle theft arrests were up 15 percent and adult arrests rose 13 percent in 1986 over the previous year. Overall arrests were 22 percent higher in 1986 than in 1982 and 4 percent above the 1977 level.

ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

Volume

In 1986, 110,732 arson offenses were recorded by 12,599 law enforcement agencies furnishing from 1 to 12 months of reports. Of these agencies, 12,464 provided the detailed information—type of structure, estimated monetary value of the property damaged, etc.—from which the tables on the accompanying pages were tabulated. Further information regarding arson offenses and trends is presented in Tables 6 through 13 and arson clearances in Tables 20 through 23. Since only 9,345 agencies covering 78 percent of the United States population submitted reports for all 12 months of the year, the data user should be aware that, while conservative indicators, the figures do not represent the Nation's total arson experience.

Trend

Arson offenses rose 6 percent nationally and in cities from 1985 to 1986. Trend figures also showed upswings of 4 percent in the suburban counties and 8 percent in the rural counties. Regionally, arson increased 10 percent in the Midwest and was up 8 percent in the South. The West and Northeast declined 3 and 2 percent respectively.

By property type, those arsons in which structures were the targets increased 1 percent nationally. Arsons of mobile property were up 15 percent, and those of all other property decreased 6 percent.

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as collection continues.

Rate

Since population coverage for arson data is lower than for the other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the 1986 rates are shown in the accompanying table.

The rates ranged from 120 per 100,000 inhabitants in cities with populations over 1 million to 26 per 100,000 rural county inhabitants. The suburban counties and all cities collectively recorded rates of 41 and 61 per 100,000 inhabitants, respectively. Overall, the 1986 national arson rate was 53 per 100,000 population.

Regionally, the highest arson rate was registered in the Western States with 64 offenses per 100,000 population. Following were the Northeastern States with a rate of 58 per 100,000, the Midwestern States with 48 per 100,000, and the Southern States with 46 per 100,000 inhabitants.

Arson Rate, Population Group, 1986

[9,345 agencies; 1986 estimated population 188,970,000: Rate per 100,000 inhabitants]

Group	Rate
Total	52.9
Total cities	60.9
Group I (cities 250,000 and over)	98.1
(cities 1,000,000 and over)	119.6
(cities 500,000 to 999,999)	75.1
(cities 250,000 to 499,999)	88.3
Group II (cities 100,000 to 249,999)	71.8
Group III (cities 50,000 to 99,999)	48.7
Group IV (cities 25,000 to 49,999)	38.5
Group V (cities 10,000 to 24,999)	30.8
Group VI (cities under 10,000)	30.2
Suburban counties	40.7
Rural counties	26.0
Suburban area	37.1

Nature

As in previous years, structures were the most frequent target of arsonists in 1986 and comprised 55 percent of the reported incidents. Twenty-eight percent of the arsons were directed at mobile property (motor vehicles, trailers, etc.), while other types of property (crops, timber, etc.) accounted for 17 percent.

Arson, Type of Property, 1986

[12,464 agencies; 1986 estimated population 192,650,000]

Property classification	Number of offenses	Percent distribution
Total	**87,585**	**100.0**
Total structure	47,846	54.6
Single occupancy residential	20,497	23.4
Other residential	8,096	9.2
Storage	4,980	5.7
Industrial/manufacturing	756	.9
Other commercial	5,909	6.7
Community/public	4,737	5.4
Other structure	2,871	3.3
Total mobile	24,485	28.0
Motor vehicles	22,578	25.8
Other mobile	1,907	2.2
Other	15,254	17.4

Residential property was involved in 60 percent of the structural arsons during the year, with 43 percent of such offenses directed at single-occupancy dwellings. Seventeen percent of all targeted structural property was either uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 92 percent of all mobile property at which arsons were directed.

Arson, Structures Not in Use, 1986

[12,464 agencies; 1986 estimated population 192,650,000]

Type of structure	Number of offenses	Percent not in use
Total	**47,846**	**17.0**
Single occupancy residential	20,497	22.3
Other residential	8,096	11.3
Storage	4,980	19.1
Industrial/manufacturing	756	11.0
Other commercial	5,909	10.3
Community/public	4,737	7.4
Other structure	2,871	22.6

The estimated value of property damaged due to reported arsons during 1986 totaled $1.2 billion, and the average loss per incident was $13,198. The overall average for all types of structures was $21,969. While industrial/manufacturing property showed the lowest number of structural incidents, it registered the highest average loss—$64,868. Mobile properties averaged $3,651 per incident, and other targets averaged $1,009.

Arson, Monetary Value of Property Damaged, 1986

[12,464 agencies; 1986 estimated population 192,650,000]

Property classification	Number of offenses	Average damage
Total	**87,585**	**$13,198**
Total structure	47,846	21,969
Single occupancy residential	20,497	12,419
Other residential	8,096	12,048
Storage	4,980	45,258
Industrial/manufacturing	756	64,868
Other commercial	5,909	38,054
Community/public	4,737	33,818
Other structure	2,871	13,790
Total mobile	24,485	3,651
Motor vehicles	22,578	3,289
Other mobile	1,907	7,940
Other	15,254	1,009

Clearances

During 1986, the national arson clearance rate was 15 percent. Rural county agencies showed the highest rate, clearing 20 percent of the arson offenses brought to their attention. Suburban counties cleared 18 percent; and city law enforcement agencies, 14 percent.

Regionally, the Southern States reported a clearance rate of 20 percent; the Western States, 15 percent; the Midwestern States, 13 percent; and the Northeastern States, 12 percent.

Arson clearances demonstrated a higher percentage of juvenile involvement than any other Index crime. Only young people under age 18 were the arrestees in 35 percent of all arson clearances, as well as for those of structural arsons. Persons in this age group accounted for 20 percent of the clearances for arsons of mobile property and 55 percent of arsons of all other property.

Arson Offenses Cleared by Arrest,[1] 1986

[12,464 agencies[2]; 1986 estimated population 192,650,000]

Property classification	Number of offenses	Percent cleared by arrest
Total	**87,585**	**18.2**
Total structure	47,846	22.5
Single occupancy residential	20,497	22.8
Other residential	8,096	24.7
Storage	4,980	18.5
Industrial/manufacturing	756	15.1
Other commercial	5,909	16.4
Community/public	4,737	34.2
Other structure	2,871	16.4
Total mobile	24,485	10.2
Motor vehicles	22,578	9.9
Other mobile	1,907	14.1
Other	15,254	17.2

[1]Includes offenses cleared by exceptional means.
[2]The number of agencies used in this table is lower than the number used in Tables 20-23. To be included in this table, it was necessary that arson clearances be reported by property classification.

By population grouping, juveniles were the offenders in 37 percent of the city arson clearances, 34 percent of those in suburban counties, and 23 percent of those in the rural counties.

Arson Offenses Cleared by Arrest[1] of Persons under 18 Years of Age, 1986

[12,464 agencies[2]; 1986 estimated population 192,650,000]

Property classification	Total clearances	Percent under 18
Total	**15,900**	**36.5**
Total structure	10,772	36.0
Single occupancy residential	4,675	30.6
Other residential	1,999	30.7
Storage	923	49.0
Industrial/manufacturing	114	32.5
Other commercial	971	24.9
Community/public	1,620	54.6
Other structure	470	46.0
Total mobile	2,498	19.8
Motor vehicles	2,229	18.3
Other mobile	269	31.6
Other	2,630	54.8

[1]Includes offenses cleared by exceptional means.
[2]The number of agencies used in this table is lower than the number used in Tables 20-23. To be included in this table, it was necessary that arson clearances be reported by property classification.

The accompanying tables show clearance data only for those 12,464 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (34 percent) was recorded for offenses in which community or public structures were involved, while the lowest (10 percent) was registered for motor vehicles.

Persons Arrested

The estimated number of arrests for arson during 1986 totaled 18,700. Forty percent of the arrestees were under 18 years of age and 63 percent were under 25. Males comprised 86 percent of all arson arrestees.

Seventy-five percent of those arrested were white, 24 percent were black, and the remainder were of other races. Eight percent of the arrestees were Hispanic.

Trends for 1985 versus 1986 show arson arrests down 3 percent nationwide. They decreased 4 percent in the Nation's cities, while those in the rural counties increased 4 percent. The volume of arson arrests in the suburban counties showed no change.

Arrests of persons under the age of 18 decreased 6 percent from 1985 to 1986; however, adult arrests showed virtually no change nationwide. During the same period, male arrests for arson were down 3 percent and female arrests, up 2 percent.

The 1986 arson arrest total for all ages decreased 7 percent from the 1982 level but was up 1 percent from the 1977 total.

CRIME INDEX TABULATIONS

This Section's tabular portions present data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses. Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; and data on the type and value of property stolen and recovered.

Although the total number of crimes occurring throughout the Nation is unknown, information on those reported to law enforcement gives a reliable indication of criminal activity. In reviewing the tables in this report, it must be remembered, however, that many factors can cause the volume and type of crime to vary from place to place. Even though population, one of these factors, is used in computing crime rates, all communities are affected to some degree by seasonal or transient populations. The populations of jurisdictions with a large influx of day workers, tourists, or shoppers, for example, may be greatly inflated during given time periods. Since counts of current, permanent population are used in their construction, crime rates do not account for these short-term population variables. A further discussion of various factors contributing to the amount of crime in a given area is shown on page *v* of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

Note

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1986 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 6 through 9. Two-year arson trends are shown in Tables 10 through 13.

Crime Index Total

The Crime Index total rose 6 percent to 13.2 million offenses in 1986, the highest total since 1981. Five- and 10-year percent changes showed the 1986 total was 2 percent above the 1982 level and 20 percent higher than in 1977.

All offenses comprising the Index increased in number from 1985 to 1986. Overall violent crime was up 12 percent with murder and robbery both rising 9 percent; forcible rape, 3 percent; and aggravated assault, 15 percent.

The number of property crimes increased 6 percent for the 2-year period. Burglary and larceny-theft each increased 5 percent, while motor vehicle theft rose 11 percent.

Considering 5- and 10-year timeframes, the 1986 violent and property crime totals each showed increases over the 1982 figures. Violent crime was up 13 percent and property crime, 1 percent. Compared to 1977, the 1986 violent crime was up 45 percent and property crime, 18 percent. National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past decade are set forth in Table 1, "Index of Crime, United States, 1977-1986." Crime rates relate the incidence of reported crime to population.

Table 2, "Index of Crime, United States, 1986," shows current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas (other cities). See Appendix III for the definitions of these community types.

Table 1. — Index of Crime, United States, 1977-1986

[1]Populations are Bureau of the Census provisional estimates as of July 1, except April 1, 1980, preliminary census counts, and are subject to change.
[2]Because of rounding, the offenses may not add to totals.
[3]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[4]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
All rates were calculated on the offenses before rounding.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1986," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, while the Southern States accounted for the largest volume of Crime Index offenses in 1986, they also represented the greatest regional population.

[1]Populations are Bureau of the Census provisional estimates as of July 1, 1985 and 1986, and are subject to change.
[2]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with National UCR guidelines. The 1986 forcible rape totals for most agencies in Illinois were, therefore estimated using the national rate of forcible rapes when grouped by like agencies. See "Offense Estimation" page 4 for details.
[5]Includes offenses reported by the Zoological Police.
[6]Population and offense data are not included in totals.
Offense totals are based on all reporting agencies and estimates for unreported areas.

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Includes offenses reported by the Zoological Police.
[5]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1986 forcible rape totals for most agencies in Illinois were, therefore, estimated using the national rate of forcible rapes when grouped by like agencies.

Table 6. — Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1986

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]Aggravated assault and burglary figures are not comparable to prior years.
[2]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports. Leaders (...) indicate zero data.
[3]Aggravated assault figures are not comparable to prior years.

Table 7. — Number of Offenses Known to the Police, Universities and Colleges, 1986

• Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data.

University/College	Student enrollment[1]	Violent[2] crime total	Violent Crime				Property[3] crime total	Property Crime

[1]The student enrollment figures provided by the U.S. Department of Education are for 1985, the most recent year available.
[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.
[4]Student enrollment figures are not available.
[5]Forcible rape figures furnished to the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports. Leaders (...) indicate zero data.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

Table 8. — Number of Offenses Known to the Police, Suburban Counties, 1986

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]
* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]Forcible rape figures furnished to the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports. Leaders (...) indicate zero data.

Table 9. — Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1986

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]
° Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified° Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson°

[1]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports. Leaders (...) indicate zero data.

[1]The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 37-39, since it is not necessary to report arsons by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdown.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the Forcible rape, Violent crime, Crime Index total, and Modified Crime Index total categories.

[1]Suburban places are within Metropolitan Statistical Areas (MSAs) and include suburban city and county law enforcement agencies within the metropolitan area. Central cities are excluded. Nonsuburban places are outside MSAs.

[2]The number of agencies used in arson trends is less than used in compiling trends for other Crime Index offenses. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the Forcible rape, Violent crime, Crime Index total, and Modified Crime Index total categories.

[1]The number of agency reports used in arson trends is less than used in compiling trends for the other Crime Index offenses. However, the number of agencies used in the arson column of this table is greater than the number used in the tables on pages 37-39 since it is not necessary to report arsons by detailed property classification breakdowns to be included in this table.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the Forcible rape categories.

Table 14. — Crime Rates, Offenses Known to the Police, Population Group, 1986

[1986 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[3]	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]
TOTAL ALL AGENCIES: 12,297 agencies; population 219,372,000:												
Number of offenses known	**12,540,501**		**1,428,670**	**11,111,831**	**19,698**	**82,931**	**531,468**	**794,573**	**3,075,754**	**6,861,566**	**1,174,511**

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for other seven Crime Index offenses. Independently tabulated arson rates appear on page 37 of this publication.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdown.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups. Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the Forcible rape, Violent crime, and Crime Index total categories. The rates for these categories were calculated excluding the population for the state of Illinois.

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 37 of this publication.
[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes core cities. Suburban cities and counties are also included in other groups.
Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.
Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the Forcible rape categories. The rates for these categories were calculated excluding the population for the state of Illinois.

Table 18. — Offense Analysis, 1986, and Percent Change from 1985

[13,378 agencies; 1986 estimated population 225,261,000]

Classification	Number of offenses 1986	Percent change over 1985	Percent distribution[1]	Average value

SECTION III
CRIME INDEX OFFENSES CLEARED

For UCR purposes, law enforcement agencies clear or solve an offense when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. Law enforcement agencies may clear a crime by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to cooperate with prosecution after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Law enforcement agencies cleared 21 percent of the Crime Index offenses brought to their attention during 1986. The overall clearance rate for violent crime was 46 percent with a 70-percent clearance rate for murder, 52 percent for forcible rape, 25 percent for robbery, and 59 percent for aggravated assault. Clearances for crimes against persons (murder, forcible rape, and aggravated assault) are generally higher as more intense investigative efforts are often given these offenses and witnesses are frequently available to identify the perpetrators.

Seventeen percent of the property crimes collectively were cleared. The clearance rate for burglary was 14 percent, and for larceny-theft, 20 percent. For both motor vehicle theft and arson, clearance rates of 15 percent were recorded. When considering the total Modified Crime Index which includes arson, the overall clearance rate remained the same, 21 percent.

Geographically, the highest clearance rate for the total Crime Index offenses was registered in the Southern States with 22 percent. Following were the Western States with 21 percent, the Midwestern States with 20 percent, and the Northeastern States with 19 percent. In addition to registering the highest Crime Index clearance percentage, the Southern States also recorded the most successful violent crime clearance, 50 percent.

Percent of Offenses Cleared by Arrest[1], Region, 1986

Region	Crime Index total	Modified Crime Index total	Violent crime	Property crime	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson
United States total	20.7	20.7	46.3	17.5	70.2	52.3	24.7	59.4	13.6	19.7	14.8	15.3
Northeastern States	19.2	19.2	42.5	15.6	69.2	55.9	24.9	58.6	13.4	18.1	8.9	12.3
Midwestern States	19.7	19.7	42.2	17.1	64.7	45.1	20.1	55.3	11.4	19.8	13.9	12.6
Southern States	21.8	21.8	50.5	18.3	75.9	56.8	27.0	62.0	15.5	19.6	18.7	19.8
Western States	21.2	21.1	46.9	18.0	64.7	48.5	25.2	59.4	12.5	20.7	16.3	15.0

[1]Includes exceptional clearances.

By community type, rural county law enforcement agencies showed clearances for 22 percent of the Crime Index offenses brought to their attention. Those in cities and suburban counties cleared 21 percent.

Clearances Involving Only Persons under 18 Years of Age

Involvement of juveniles in crime can be measured by the number of crimes in which they have been identified as the offenders. Even though no physical arrest has been made, a clearance by arrest is recorded when an offender under 18 years of age is cited to appear in juvenile court or before other juvenile authorities. Juveniles (persons under 18 years of age) accounted for an estimated 26 percent of the 1986 U. S. population.

Nineteen percent of the Crime Index offenses cleared by law enforcement during 1986 involved only young people under age 18. Persons in this age group accounted for 9 percent of the violent crime clearances and 23 percent of those for property crimes. Murder showed the lowest percentage of juvenile involvement (5 percent), while the highest percentage was shown for arson (35 percent).

Regionally, the Midwest recorded the largest percentage of Crime Index offense involvement by the under 18 age group– 24 percent. Juveniles were the offenders in 21 percent of the clearances in the Western States, 18 percent of those in the Northeastern States, and 16 percent of those in the Southern States.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance tables on page 39, since it is not necessary to report clearances by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the Forcible rape, Violent crime, Crime Index total, and Modified Crime Index total categories.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. However, the number of agencies used in the arson column for this table is greater than the number used in the clearance tables on page 39, since it is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other city groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines and were excluded from the Forcible rape, Violent crime, Crime Index total, and Modified Crime Index total categories.

SECTION IV
PERSONS ARRESTED

In addition to being a gauge of law enforcement's response to crime, arrest counts provide definitive data concerning the age, sex, race, and ethnic origin of the perpetrators. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time as, for example, during a local police campaign against residential burglary. While the practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies, those for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. This Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

Law enforcement agencies nationwide made an estimated 12.5 million arrests in 1986 for all criminal infractions except traffic violations. When the arrest volume was related to the total United States population, the arrest rate was 5,232 per 100,000 inhabitants. In cities with populations of 250,000 or more, the rate was 7,735, the highest recorded. For suburban county agencies overall, the arrest rate was 3,914, and for rural county law enforcement, it was 3,440 per 100,000 inhabitants.

Regionally, the arrest rates per 100,000 population ranged from 4,180 in the Midwest to 5,978 in the West. The South recorded an arrest rate of 5,314 and the Northeast, 5,402.

Arrest Trends

The number of arrests for all offenses except traffic violations increased 5 percent in 1986 as compared to the 1985 volume. During the same time period, adult arrests also rose 5 percent, while those of persons under 18 years of age were up 3 percent. Also on the upswing in 1986 were arrests for the eight Crime Index offenses overall. Compared to 1985 totals, Crime Index arrests for persons of all ages increased 6 percent, adult arrests rose 8 percent, and juvenile arrests were up 1 percent. Arrests for the Index's violent crimes jumped 12 percent and those for property crimes rose 4 percent.

Similar to the national experience, 2-year trends for city agencies showed a 5-percent increase in total arrests, 1986 over 1985. Suburban county arrests were up 4 percent and rural county arrests, 3 percent.

For the 5-year period, 1982-1986, total arrests increased 7 percent. While adult arrests were up 8 percent, those of persons under 18 years of age dropped 1 percent. Five-year trends for the Crime Index revealed increases of 3 percent for total arrests, and 5 percent for adults. Conversely, arrests of juveniles under 18 years of age dropped 4 percent. During the same years, total violent and property crime arrests increased, 8 and 1 percent, respectively.

Increases in total arrests were recorded for the 10 years, 1977-1986. Arrests for all offenses were up 27 percent; Crime Index offenses, 18 percent; violent crimes, 33 percent; and property crimes, 15 percent.

Arrests for drug abuse violations were 2 percent higher in 1986 than in 1985 and 30 percent above the 1982 level. The types of drugs involved in violations resulting in arrests during 1986 are shown by geographic region in the accompanying table.

Arrests for Drug Abuse Violations, 1986

[Percent distribution]

	United States total	North-eastern States	Mid-western States	South-ern States	Western States
Total[1]	100.0	100.0	100.0	100.0	100.0

Other dangerous nonnarcotic drugs	9.1	4.1	9.2	4.5	16.9

[1]Because of rounding, percentages may not add to totals.

Age

Five percent of all persons arrested nationwide in 1986, were under the age of 15; 17 percent were under 18; 31 percent were under 21; and 49 percent were under 25. Persons in the under 25 age group accounted for 50 percent of arrests in the cities, 45 percent of those in the suburban counties, and 41 percent of those in the rural counties.

Age distribution figures for persons arrested for Crime Index offenses showed 30 percent were under the age of 18; 45 percent were under 21; and 60 percent, under 25. The under 25 age group was also responsible for 48 percent of the violent crime arrests and 64 percent of property crime arrests in 1986.

Sex

Four of every 5 persons arrested in the Nation during 1986 were males. They accounted for 79 percent of Index crime arrests, 89 percent of those for violent crime, and 76 percent of the property crime arrests. Males were most often

arrested for driving under the influence, which accounted for 15 percent of all male arrests.

As in past years, larceny-theft was the crime for which females were most often arrested. This single offense accounted for 79 percent of arrests of women for Index crimes and 20 percent of all female arrests. Fifty-five percent of all female larceny-theft arrestees were under 25 years of age.

Arrests of both males and females rose 5 percent from 1985 to 1986. Male arrests also showed a 5-percent rise from 1982 to 1986, while female arrests were up 13 percent for the same 5-year period.

Table 24.—Total Estimated Arrests[1], United States, 1986

TOTAL[2]	12,487,500	Fraud	349,300
Murder and nonnegligent manslaughter	19,190	Embezzlement	12,600
Forcible rape	37,140	Stolen property; buying, receiving, possessing	135,800
Robbery	145,800	Vandalism	259,600
Aggravated assault	351,770	Weapons; carrying, possessing, etc.	190,500
Burglary	450,600	Prostitution and commercialized vice	112,600
Larceny-theft	1,400,200	Sex offenses (except forcible rape and prostitution)	100,600
Motor vehicle theft	153,600	Drug abuse violations	824,100
Arson	18,700	Gambling	30,500
		Offenses against family and children	58,400
Violent crime[3]	553,900	Driving under the influence	1,793,300

Forgery and counterfeiting	92,200	Suspicion (not included in totals)	9,000
		Curfew and loitering law violations	86,200
		Runaways	165,200

[1]Arrest totals based on all reporting agencies and estimates for unreported areas.
[2]Because of rounding, items may not add to totals.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson.

Race

Race distribution figures for the total number of arrests in the United States during 1986 showed 71 percent of the arrestees were white, 27 percent were black, and the remainder were of other races. Whites accounted for 52 percent of the arrests for violent crimes and 68 percent of those for property crimes, while blacks accounted for 46 percent of the violent crime arrests and 30 percent of the property crime arrests.

[1]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.
[2]Because of rounding, the percentages may not add to total.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson.
[6]Less than one-tenth of 1 percent.

[2]Because of rounding, the percentages may not add to total.
[3]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are included in other groups.

Law Enforcement Code of Ethics

As a Law Enforcement Officer, *my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

I will *keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

I will *never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

I recognize *the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

SECTION V
LAW ENFORCEMENT PERSONNEL

The Nation's law enforcement community employed an average of 2.1 full-time officers for every 1,000 inhabitants as of October 31, 1986. Considering full-time civilians, the overall law enforcement employee rate was 2.8 per 1,000 inhabitants according to 12,132 city, county, and state police agencies reporting in 1986. These agencies collectively offered law enforcement service to a population of nearly 225 million, employing 475,853 officers and 153,892 civilians.

Varying demographic and other jurisdictional characteristics greatly affect the requirements for law enforcement service from one locale to another. The needs of a community having a highly mobile or seasonal population, for example, may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate manpower for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

City law enforcement employee averages in 1986 ranged from 2.1 per 1,000 inhabitants in those with populations from 10,000 to 99,999 to 3.5 for those with populations of 250,000 or more. Rural and suburban counties averaged full-time law enforcement employee rates of 3.4 and 3.0 per 1,000 population, respectively.

Regionally, the highest law enforcement employee rate was in the Northeast with 2.9. Following were the South with 2.8, the Midwest with 2.5, and the West with 2.4.

Full-time Law Enforcement Employees[1], Rate per 1,000 Inhabitants, Region, October 31, 1986

	Total (9,253 cities; population 152,175,000)	Group I (60 cities, 250,000 and over; population 43,631,000)	Group II (122 cities, 100,000 to 249,999; population 17,806,000)	Group III (292 cities, 50,000 to 99,999; population 19,933,000)	Group IV (643 cities, 25,000 to 49,999; population 22,183,000)	Group V (1,612 cities, 10,000 to 24,999; population 25,237,000)	Group VI (6,524 cities under 10,000; population 23,385,000)
TOTAL: 9,253 cities; population 152,175,000: Average number of employees per 1,000 inhabitants	2.6	3.5	2.4	2.1	2.1	2.1	2.8
Northeastern States: 2,380 cities; population 38,991,000: Average number of employees per 1,000 inhabitants	2.9	4.6	3.1	2.4	2.3	2.0	2.1
Midwestern States: 2,496 cities; population 38,561,000: Average number of employees per 1,000 inhabitants	2.5	3.8	2.2	1.9	1.8	1.9	2.5

Western States: 1,231 cities; population 32,104,000: Average number of employees per 1,000 inhabitants	2.4	2.7	2.0	1.9	2.0	2.1	3.6

[1]Includes civilians.

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.1 officers per 1,000 inhabitants. By population grouping, the lowest average rate (1.7) was for cities with populations of 10,000 to 99,999; cities 250,000 or more in population recorded the highest rate, 2.8. Suburban county law enforcement agencies averaged 2.0 officers per 1,000 population, while agencies in rural counties averaged 2.4.

Regionally, the highest rate of officers to population was recorded in the Northeastern States where there were 2.4 officers per 1,000 inhabitants. The Southern States averaged 2.2, the Midwestern States, 2.0, and the Western States with 1.7.

Nationally, as well as in city agencies, males comprised 93 percent of all sworn employees. Ninety percent of the officers in suburban counties were males, while in rural counties they accounted for 94 percent.

Civilian Employees

Civilians made up 24 percent of the total United States law enforcement employee force in 1986. They represented 20 percent of the police employees in cities, 32 percent of those in suburban counties, and 31 percent of the rural law enforcement strength.

Law Enforcement Officers Killed and Assaulted

Sixty-six law enforcement officers were feloniously slain in the line of duty during 1986, 11 fewer lives lost than in 1985. The annual total was lower than for any year since 1968 when records show 64 officers were slain.

Extensive data on line-of-duty deaths and assaults on city, county, state, and Federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted.*

SECTION VI
APPENDIX I
TABLE METHODOLOGY

Designed to assist the reader, this appendix explains the construction of many tabular presentations in the book. The following key refers to the columnar headings used throughout the appendix.

Key: A) Column 1 shows the table numbers. Included are Tables 1 through 69, *Crime in the United States-1986.*

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table. There are three levels of participation:

1. Agencies having reported data for all 12 months of the year.
2. Agencies having reported data for at least one month but less than 12 months of the year.
3. Nonreporting agencies.

The tabulations presented in the publication employ statistics from one or more of these participation levels. For example, Table 2 includes all three agency reporting levels, but Table 14 presents only data for agencies having reported the entire year.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1986 statistics are consistent with Table 2. Pre-1986 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 provisional estimations for each year except April 1, 1980. The offense breakdowns are according to UCR crime definitions (App. II). Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes and rates are computed prior to rounding.	Represents an estimation of national reported crime activity from 1977 to 1986.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1986).	Statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1986, Bureau of the Census provisional estimates. The tabular breakdowns are in accordance with UCR crime definitions (App. II) and population classifications (App. III).	Represents an estimation of national reported crime activity in 1986.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1986).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on July 1, 1986, Bureau of the Census provisional estimates.	Represents the 1986 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1986 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1985 and 1986. Population statistics represent July 1 provisional estimates for 1985 and 1986. The offense breakdowns are according to UCR crime definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic differences.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1986).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1986, Bureau of the Census provisional estimates. Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports. The offense breakdowns are according to UCR definitions (App. II).	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic differences.
6	All law enforcement agencies submitting complete reports for 12 months in 1986.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The populations are July 1, 1986, estimates for each agency.	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic differences.
7	All university/college law enforcement agencies submitting complete reports for 12 months in 1986.	The 1985 student enrollment figures, which are provided by the U.S. Department of Education, are the most recent available.	Represents reported crime from those individual university/college law enforcement agencies contributing to the UCR Program. These agencies are listed alphabetically by state. Any comparison of these UCR statistics should take into consideration size of enrollment, number of on-campus residents, plus other demographic differences.
8	All law enforcement agencies submitting complete reports for 12 months in 1986.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are as of July 1, 1986.	Represents crime reported to individual law enforcement agencies in suburban counties, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic differences.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
9	All law enforcement agencies submitting complete reports for 12 months in 1986.	"Rural Counties" are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on July 1, 1986, estimates for individual agencies.	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic differences.
10-13	All law enforcement agencies submitting complete reports for at least 6 common months in 1985 and 1986.	The 1986 crime trend statistics are 2-year comparisons based on 1986 reported crime activity. Only common reported months for individual agencies are included in 1986 trend calculations. Populations represent July 1, 1986, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 13 due to editing procedure and lower submission rate.
14-17	All law enforcement agencies submitting complete reports for 12 months in 1986.	The 1986 crime rates are the ratios of the aggregated 1986 crime volumes and the aggregated 1986 populations of the contributing agencies. Population statistics represent July 1, 1986, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III). Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 17 due to editing procedure and lower submission rate.
18, 19	All law enforcement agencies submitting complete reports for at least 6 months in 1986.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total with each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1985 and 1986.	Aggravated assault is excluded from Table 18. For UCR Program purposes, the taking of money or property in connection with an assault is reported as a robbery.
20-23	All law enforcement agencies submitting complete reports for at least 6 months in 1986.	The 1986 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1986. Population statistics represent July 1 estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications (App. III).	
24	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1986).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 26) divided by the percent of total group population reporting (according to July 1, 1986, estimates).	
25, 26	All law enforcement agencies submitting complete reports for 12 months in 1986.	The 1986 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1986 reported arrest statistics and population. The population statistics represent the July 1, 1986, estimates for individual agencies. The tabular breakdowns are according to UCR crime definitions (App. II) and population classifications/geographical configuration (App. III).	
27, 28	All law enforcement agencies submitting complete reports for 12 months in 1977 and 1986.	The arrest trends are the percentage differences between 1977 and 1986 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1986, estimates.	
29, 30	All law enforcement agencies submitting complete reports for 12 months in 1982 and 1986.	The arrest trends are the percentage differences between 1982 and 1986 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1986, estimates.	
31, 32	All law enforcement agencies submitting complete reports for 12 months in 1986.	The arrest trends are 2-year comparisons between 1985 and 1986 arrest volumes aggregated from common agencies. Population statistics represent July 1, 1986, estimates.	
33-39	All law enforcement agencies submitting complete reports for 12 months in 1986.		Slight decrease in coverage for Tables 38 and 39 due to editing procedure and lower submission of race and ethnic origin data.

(1)	(2) Data Base	(3) Table Construction	(4) General Comments
40, 41	All city law enforcement agencies submitting complete reports for 12 months in 1985 and 1986.	The 1986 city arrest trends represent the percentage differences between 1985 and 1986 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
42-46	All city law enforcement agencies submitting complete reports for 12 months in 1985 and 1986.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Tables 45 and 46 due to editing procedure and lower submission of race and ethnic origin data.
47, 48	All suburban county law enforcement agencies submitting complete reports for 12 months in 1985 and 1986.	The 1986 suburban county arrest trends represent percentage differences between 1985 and 1986 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	
49-53	All suburban county law enforcement agencies submitting complete reports for 12 months in 1986.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	Slight decrease in coverage for Tables 52 and 53 due to editing procedure and lower submission rate.
54, 55	All rural county law enforcement agencies submitting complete reports for 12 months in 1985 and 1986.	The 1986 rural county arrest trends represent percentage differences between 1985 and 1986 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. III).	
56-60	All rural county law enforcement agencies submitting complete reports for 12 months in 1986.	"Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Tables 59 and 60 due to editing procedure and lower submission of race and ethnic origin data.
61, 62	All suburban area law enforcement agencies submitting complete reports for 12 months in 1985 and 1986.	The 1986 suburban area arrest trends represent percentage differences between 1985 and 1986 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	
63-67	All suburban area law enforcement agencies submitting complete reports for 12 months in 1986.	"Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	Slight decrease in coverage for Tables 66 and 67 due to editing procedure and lower submission of race and ethnic origin data.
68	All law enforcement agencies submitting complete reports for 12 months in 1986.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1 provisional estimates for 1986. The tabular breakdowns are according to UCR crime definitions (App. II).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
69	All law enforcement agencies submitting complete reports for 12 months in 1986.	Population statistics represent July 1, 1986, estimates for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II
OFFENSES IN UNIFORM CRIME REPORTING

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are as follows:

Criminal homicide.– a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape.– The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used– victim under age of consent) are excluded.

Robbery.– The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault.– An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary-breaking or entering.– The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft).– The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft.– The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson.– Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

Other assaults (simple).– Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting.– Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud.– Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement.– Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing.– Buying, receiving, and possessing stolen property, including attempts.

Vandalism.– Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.– All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice.– Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice). – Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations.– State and local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs.

Gambling.– Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children.– Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence.– Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws.– State or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness.– Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct.– Breach of the peace.

Vagrancy.– Vagabondage, begging, loitering, etc.

All other offenses.– All violations of state or local laws, except those listed above and traffic offenses.

Suspicion.– No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws.– (persons under age 18).– Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways.– (persons under age 18).– Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III
UNIFORM CRIME REPORTING AREA DEFINITIONS

Community Types

Uniform Crime Reporting data are often presented using three community-type aggregations. These are Metropolitan Statistical Areas (MSAs), other cities, and rural counties.

The MSA concept was developed to facilitate the analysis and dissemination of uniform statistical information on metropolitan areas. The primary objective in establishing standard definitions of these areas was to make it possible for Federal agencies to utilize the same boundaries when publishing statistical data. Each MSA is an integrated economic and social unit with a recognized large population nucleus. Detailed criteria followed in establishing and defining MSAs can be found in the U. S. Department of Commerce publication, *State Metropolitan Area Data Book*, 1986 edition.

An MSA includes a central city of at least 50,000 population or an urbanized area of at least 50,000. The county containing the central city and contiguous counties having strong economic and social relationships to the central city and county are also included. Counties in MSAs are designated suburban in UCR. An MSA may cross state lines.

New England MSAs are comprised of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSA. However, some counties have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural area.

MSAs made up approximately 76 percent of the total United States population in 1986. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded.

"Other cities," most of which are incorporated, are those outside MSAs. They comprised 10 percent of the 1986 population of the United States.

Rural counties, like "other cities," are outside MSAs. Covering areas not under the jurisdiction of city police departments, rural county law enforcement agencies offered service to 14 percent of the national population in 1986.

The following diagram illustrates the aforementioned discussion of the community types.

<table>
<tr><td rowspan="2">CITIES</td><td>MSA</td><td>NON-MSA</td></tr>
<tr><td>CENTRAL CITIES 50,000 AND OVER</td><td rowspan="2">OTHER CITIES</td></tr>
<tr><td></td><td>SUBURBAN CITIES</td></tr>
<tr><td>COUNTIES (Unincorporated area)</td><td>SUBURBAN COUNTIES</td><td>RURAL COUNTIES</td></tr>
</table>

Population Groups

The population group classifications used by the UCR Program are as follows:

Population Group	*Political Label*	*Population Range*
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City	Less than 10,000
VIII (Rural County)	County	N/A
IX (Suburban County)	County	N/A

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. To obtain the 1986 figures, for example, state growth rates, as supplied by the Bureau of the Census, were applied to every jurisdiction within each state. The base figures were 1984 Bureau of the Census estimates for all counties and cities.

The following table shows the number of UCR contributing agencies within each population group for 1986.

Population Group	*Number of Agencies*	*Population Covered*
I	61	44,077,000
II	126	18,385,000
III	309	21,110,000
IV	679	23,496,000
V	1,691	26,550,000
VI	7,775	25,363,000
VIII (Rural County)	3,714	34,125,000
IX (Suburban County)	1,668	47,973,000
Total	16,023	241,077,000[1]

[1]Because of rounding, the population covered does not add to total.

Regions and Divisions

As shown in the accompanying map, the United States is comprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

NORTHEASTERN STATES

New England	Middle Atlantic
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

MIDWESTERN STATES

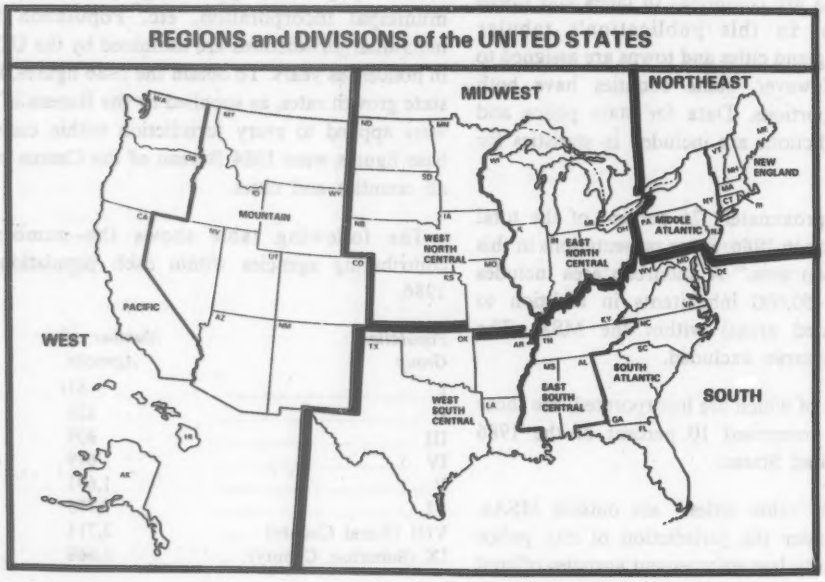
East North Central	West North Central
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

SOUTHERN STATES

South Atlantic	East South Central
Delaware	Alabama
District of Columbia	Kentucky
Florida	Mississippi
Georgia	Tennessee
Maryland	West South Central
North Carolina	Arkansas
South Carolina	Louisiana
Virginia	Oklahoma
West Virginia	Texas

WESTERN STATES

Mountain	Pacific
Arizona	Alaska
Colorado	California
Idaho	Hawaii
Montana	Oregon
Nevada	Washington
New Mexico	
Utah	
Wyoming	



APPENDIX IV
INDEX OF CRIME, METROPOLITAN STATISTICAL AREAS, 1986

Metropolitan Statistical Area	Population	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[2]	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]
Abilene, Tx. M.S.A.	**128,446**												
(Includes Taylor County.)

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 6.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. The 1986 forcible rape totals for most agencies in Illinois were, therefore, estimated using the national rate of forcible rapes when grouped by like agencies. See "Offense Estimation" page 4 for details. Forcible rapes for Illinois agencies are shown only if the counts were supported by supplemental reports.

[5]Aggravated assault figures are not comparable to prior years.

[6]Aggravated assault and burglary are not comparable to prior years.

APPENDIX VI
CRIMINAL INVOLVEMENT OF MURDER ARRESTEES

Appendix VI focuses on murder arrestees who were initially arrested in 1976 for the crime of murder. A cohort of 6,838 individuals was examined and their arrest records were followed during the subsequent 11 years, 1976-1986.

The data used in this appendix were obtained from the FBI's Automated Identification Division System (AIDS) which is based on fingerprints from arresting agencies. Initially, the demographic characteristics of these 6,838 murder arrestees were examined. Table 1 delineates the age, sex, and race breakdown of these arrestees. Table 1 is graphically represented in Charts 1 and 2.

For Tables 2-4, attention shifts to the subsequent arrest records of the murder arrestees during the period 1976-1986 as reflected in the AIDS data. The unit of count switches from individuals to arrests. If a person is arrested more than once, each of these arrests is counted. The number of subsequent arrests for the 6,838 individuals mentioned above for the 11-year period was 6,113 (Table 2). This figure includes arrests for crimes in all offense categories including murder. The age column of Table 2 represents the age at the time subsequent arrests were made in 1976.

Table 3, Arrest Records of 6,838 Murder Arrestees by Year, delineates the number of arrests made for these murder arrestees during the period, 1976-1986. Again, the totals encompass all categories of crime including murder.

Table 4 depicts the rearrest records of 6,838 murder arrestees by crime category and summarizes the 11-year period, 1976-1986. In Table 5, the yearly rearrest experience is presented by offense.
